

DIVYANT PRATAP

SENIOR DATA ANALYST / MACHINE LEARNING / GENERATIVE AI

Bengaluru, India • divyantpratap@gmail.com • +91 83848 15651

Portfolio • GitHub • LinkedIn • HackerRank

CAREER OBJECTIVE

Senior Data Analyst with 4.5+ years of experience specializing in machine learning, Generative AI, and advanced analytics. Proven expertise in SQL, Python, Tableau, and Excel, with a track record of independently leading end-to-end projects to drive measurable business outcomes. Strong communicator passionate about translating complex data insights into actionable strategies.

EXPERIENCE

Senior Data Analyst | Bidgely Technologies - Bengaluru

Jan 2025 - Present

- Engineered and productized an XGBoost-based LMI Detection pipeline, architecting the end-to-end deployment framework that reduced onboarding time by 50%, secured 4 major clients, and generated \$6.5M in revenue.
- Developed the EV Estimation Improvement Pipeline, independently building advanced strike-classification logic that boosted accuracy by 30% and reduced false positives by 80%.
- Designed and architected the Production Monitoring Dashboard, unifying 40+ Redshift metrics across 6 views and 9 appliance categories to save about 8 analyst-hours weekly (roughly \$80K annually) and serve as leadership's primary view for production-health decisions.
- Pioneered baseline rule development for EV L1 detection, independently architecting algorithms that slashed false-positive rates by 75% (from 45% to 11%), improving model reliability for production deployment.
- Executed AIAV EV Model-Level Improvements, independently designing comprehensive ML and DL tests on a 60,000-user dataset, enhancing precision by 5.19 pp (to 90%) and recall by 6 pp (to 97%), impacting 10M+ EV users.
- Built a GenAI-based SQL Workbench, leading solo development of an intuitive tool to streamline complex query generation and cut analysis time by 70%.
- Created the API Utility Tool, a Streamlit platform unifying 50+ Bidgely APIs across 11 environments, with automated token handling and batch fetching to combine multi-API user data in one run.
- Engineered the TagMap Analyzer GT Tool, independently streamlining tagging and mapping workflows to reduce manual tagging effort by 50%.
- Mentored 2 junior analysts and collaborated cross-functionally to drive impactful, data-driven product improvements.

Data Analyst | Bidgely Technologies - Bengaluru

Jun 2022 - Dec 2024

- Spearheaded the ML Model Validation Process, leveraging data-driven analysis to identify new features and propose product enhancements, significantly improving product quality and user experience.
- Collaborated with data scientists to refine an EV deep-learning model, increasing precision from 67% to 82% and recall from 82% to 94% while supporting deployment across geographies and sampling rates.
- Streamlined workflows by designing an innovative User Selection and Porting Script, optimizing categorization accuracy and reducing manual effort by 90% in man-hours, enabling a more efficient selection process.
- Developed a User Creation Model for Data Simulation, generating realistic user profiles aligned with existing patterns, reducing testing costs by 80% and enhancing alignment with current user behavior trends.
- Conducted a comprehensive analysis of survey data from 8 million users, identifying key attributes to inform product and marketing strategies, leading to a 2x increase in email-to-survey conversion rates and a 40% reduction in drop-off rates.
- Performed sentiment analysis on feedback from 100K users using NLTK, driving targeted product improvements that increased overall user satisfaction by 15%.

Field Quality Engineer (GET) | Fiat India Automobiles - Pune

Aug 2021 - May 2022

- Served as the focal point for electrical and electronics field failures of Jeep Compass and Jeep Wrangler.
- Analyzed field data to identify root causes and implement corrective actions for electrical and electronics issues.
- Drove development of an internal tracking system used by 80 employees, reducing operation time by 20% for Jeep products.
- Led major product improvements in Battery and Wiring Harness, driving a 30% decrease in warranty cost.

SKILLS

TECHNICAL SQL (Proficient), Python (Expert), Machine Learning, Tableau, Power BI, Data Analysis, Data Visualization, Data Acquisition, NLP, TensorFlow, Generative AI, LLMs, RAG, Market Research

TOOLS & PLATFORMS MySQL Workbench, Jupyter, VS Code Server, Tableau, PostgreSQL, Excel, Google Sheets, PowerPoint, AWS/EC2, CLI, Postman, Jenkins

LIBRARIES & FRAMEWORKS pandas (Expert), NumPy, Requests, scikit-learn, XGBoost, Matplotlib, seaborn, TensorFlow, NLTK, OpenCV, PyCaret, Auto-Sklearn, ChromaDB

STATISTICS & EVALUATION Hypothesis Testing, Regression Analysis, Model Evaluation and Validation, Confusion Matrices, Cross Validation, ROC Curves

PROFESSIONAL STRENGTHS Documentation, Problem Solving, Strategy, Teamwork, Time Management, Communication, Presentation Skills

PERSONAL PROJECTS

Saarthi - GenAI Chatbot for UPSC Aspirants | Gemini 2.5 Flash / RAG / ChromaDB | PROJECT

Jan - Mar 2025

- Developed a specialized GenAI bot for UPSC aspirants using Gemini 2.5 Flash, implementing a Retrieval-Augmented Generation (RAG) pipeline to provide highly accurate, contextual answers from a proprietary knowledge base.
- Engineered a complete data-ingestion workflow using web scraping and PDF parsing to build a ChromaDB vector store, ensuring responses were grounded in UPSC study material.

Credit-Card Fraud Detection | PyCaret / AutoML | ROADMAP

2026 Roadmap

- Defined a PyCaret AutoML build plan for 280K+ transactions with leakage-safe model selection, calibrated probabilities, cost-aware thresholds, and reproducible evaluation.
- Prioritized PR-AUC, fraud recall, precision, and false positives per 1,000 transactions; resume metrics will be added only after held-out validation.

Flight Fare Prediction | Auto-Sklearn | ROADMAP

2026 Roadmap

- Defined an Auto-Sklearn pipeline for 300K+ flight records targeting MAE under INR 2,500 with temporal validation and a transparent baseline comparison.
- Planned datetime, route, and categorical feature engineering plus prediction intervals, slice analysis, tests, and a Streamlit scenario explorer.

EDUCATION & CREDENTIALS

B.Tech, Electrical Engineering | National Institute of Technology Raipur

2017 - 2021 | CPI 8.54/10

CERTIFICATIONS IBM Generative AI Engineering • Generative AI with LLMs • Google Data Analytics • Applied Machine Learning in Python

ACHIEVEMENTS 6x Employee of the Month - Bidgely • HackerRank: 5-star SQL / 4-star Python • IIT Roorkee MPPT research: +12% efficiency
